## Convertible solar bag – Energy wherever you are

The new conception of SOLARC is this trendy and multifunctional solar bag, developed in cooperation with Artbag24,

A flexible and powerful solar module is integrated in the cover of the bag. On this account, the bag is not only an eye-catcher, but also an energy-catcher.

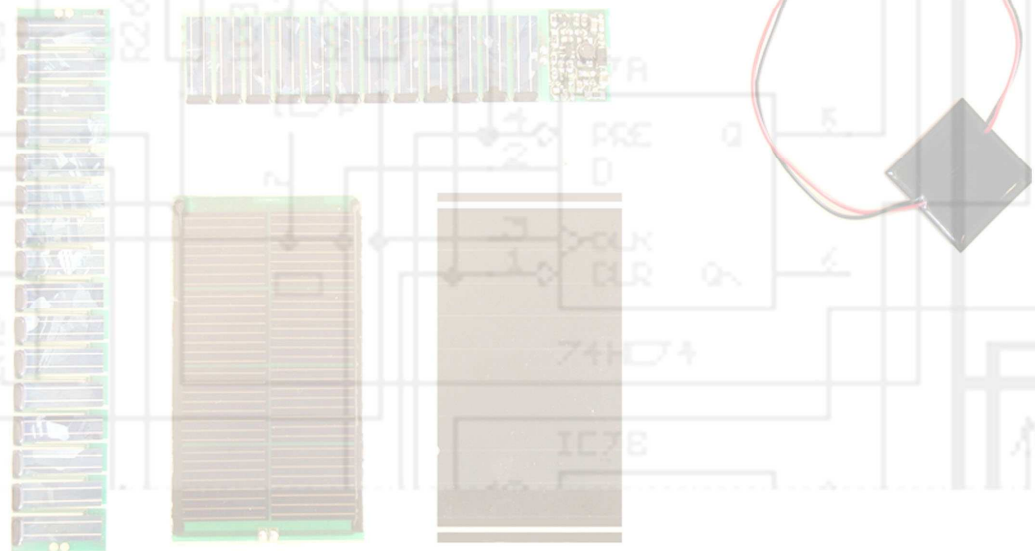

A microprocessor controlled battery module stores the solar energy and enables the charge of many small devices like PDAs, mobile telephones, mp3-players, iPods®, ... An energy supply is guaranteed at any time.

Another highlight of the bag is its versatility and singularity.

The cover of the bag can be both remove and replaced, so that the owner has the possibility of using any of the cover models of the offered by Artbag24.

The module of the battery can be connected with many different devices through optional cables and connectors, which adapt the voltage and power to each consumer.

A patented cable is useful for all current models of mobile telephone, organizers, GPS devices, iPods and many others.

# Let's start - SOLARC!

## Solar bag in brief:

- Non – stop current
- Compact and light
- Interchangeable, printable and customizable front cover
- High efficiency flexible solar module ( 1Wp ) 7,7 x 4 inches ( ca.19,7 x 10,2 cm )
- Charge PDAs, GPS, mobile phones, MP3-Player and iPod®
- Overcharge protection, display charge status, protection from deep discharge
- External charge through mains-operated adaptor
- USB connector door to permit charging battery chargers
- Optional adaptor-plug available for sundry mobile models
- Artbody solar bag is made of black nubuck PVC and soft synthetic fabric
- Bagjack solar bag is made of resistant nylon textile
- Patented worldwide high quality

## Samples:

We offer two versions of solar shoulder bag:

M-Corpus: 14,5 x 10,6 x 3,5 inches (ca. 37 x 27 x 9 cm)  
Little M-Corpus: 11.8 x 9,8 x 2,7 inches (ca.30 x 25 x 7 cm)

## Technical data:

Battery: Li-Ion 3,7V / 950mA or 1800mA  
Output voltage: 5V and 6V (other devices)  
Display: Battery status, Solar charge  
(through LED)  
Dimensions: 13 x 60 x 74mm

## Standard charging time:

- In sunny days the battery is recharged after 4 hours
- A normal mobile telephone is recharged in 2 or three hours
